1.1.1: Original Access Mode

Explanation	Size	Order	Value Space	Datatype
An access mode through which the intellectual content of the resource is communicated, not including any adaptations.	0 or 1	Unspecified	auditory, tactile, textual, visual	Vocabulary
This element is used to indicate the sensory method required to access the content of the referenced (original) resource.				

Vocabulary Recommendations

Indicate what senses are required to access the original unadapted resource. Choose one of the following:

auditory - perceived by the sense of human hearing or its equivalent

tactile - perceived by the sense of human touch or its equivalent

textual - perceived by access to or transformation of character strings or text

visual - perceived by the sense of human sight or its equivalent

Note that it is expected that the following vocabulary item will be added to this controlled vocabulary in the upcoming ISO documentation

olfactory - perceived by the sense of human smell or its equivalent

Example

Original Access Mode:
    auditory
